## INTRODUCTION

---

Conference "Management and Safety - M&S" reached 11<sup>th</sup> edition due to loyal authors and participants and hereby joined the rank of successful traditional and international scientific and professional conferences.

The conference has a successful history, and a promising future: human, social and economic aspects of safety, the constant emergence of new risks, and thus the need for effective and preventive measures and forms of protection, and, above all, the need for international cooperation in research and development of safety management.

Since the first conference held 2006<sup>th</sup> year (M&S 2006) to the 10<sup>th</sup> Conference (M&S 2015) gathered a total of 1,655 authors and participants: presented a total of 483 papers, which were reviewed and categorized as scientific and professional papers published in full in the printed proceedings of a total of 4,975 pages.

In the last years by the program cycle: "Basic functions of management and safety" (M&S 2010 - M&S 2014) conferences topics were: "Planning and safety", "Organization and safety", "Human resources management and safety", "Leading and safety" and "Controlling and safety". That program cycle presented relationship between safety and basic functions of management, thoroughly and in a unique way in global terms of the profession and science of management and safety. Previously, conferences topics were "Integrated management system and safety" (M&S 2008), "Crisis management and safety" (M&S 2009).

A new five-year program cycle of conference titled "Modern concepts of management and safety" determined with the annual topics: "Stress management and safety" (M&S 2015), "Sustainable development and safety" (M&S 2016), "Knowledge management and safety" (M&S 2017), "Project and processes management and safety" (M&S 2018) and "Safety information systems management" (M&S 2019). Those themes are a challenge for an international cooperation on scientific research and development projects, solving problems and providing models of synergy of modern concepts of management and safety of people, property and environment.

11<sup>th</sup> International Conference "Management and Safety - M&S 2016" has the current topic "Sustainable development and safety".

## VENUE AND ACCOMMODATION

---

### VRNJAČKA BANJA

<http://www.vrnjackabanja.co.rs>

Vrnjačka Banja is located 200 km south of Belgrade, in central Serbia, and belongs to Raška District. It is connected to all major cities and centers by road and rail traffic. The municipality of Vrnjačka Banja includes 13 villages in which, along with the town of Vrnjačka Banja, the population is about 25,000. The population of the very town is about 10,000. Known for the mineral water 'Vrnjci', it is often referred to as Vrnjci instead of Vrnjačka Banja. A wide range of hotels, villas, apartments, private accommodation, and room and board accommodation place this spa among the most visited tourist destinations in Serbia. Famous for its healing waters and experts in the treatment of diabetes and digestive organs, Vrnjačka Banja is a center with the latest medical services for prevention, treatment, diagnostics and rehabilitation of digestive organs and diabetes.

### SOLARIS RESORT

<http://www.solarisresort.com>

Solaris Resort is a new and modernly furnished complex within the tourist offers of Vrnjačka Banja. The ambience exudes comfort, pleasure and artistic charm which won't leave the guests indifferent. The complex offers luxury apartments and family rooms with elegant interior, a restaurant, aperitif bar, conference room, parking lot. We also offer sports and recreation facilities with indoor and outdoor pools, Fitness Center, exclusive Wellness Center and a Relax Zone.

A congress hall (250 seats) and children's corner are under construction. As such, the offer is going to be unique in the region.

The complex is located in a quiet part of Vrnjačka Banja close to the main promenade. It is an ideal place for vacation and relaxation. Friendly, professional and helpful staff provides the service measured by the highest world standards.
