INTRODUCTION

Conference "Management and Safety - M&S" reached 12th edition due to loyal authors and participants and hereby joined the rank of successful traditional and international scientific and professional conferences.

The conference has a successful history, and a promising future: human, social and economic aspects of safety, the constant emergence of new risks, and thus the need for effective and preventive measures and forms of protection, and, above all, the need for international cooperation in research and development of safety management.

Since the first conference held 2006th year (M&S 2006) to the 11th Conference (M&S 2016) gathered a total of 1,765 authors and participants: presented a total of 527 papers, which were reviewed and categorized as scientific and professional papers published in full in the printed proceedings of a total of 5,440 pages.

In the last years by the program cycle: "Basic functions of management and safety" (M&S 2010 - M&S 2014) conferences topics were: "Planning and safety", "Organization and safety", "Human resources management and safety", "Leading and safety" and "Controlling and safety". That program cycle presented relationship between safety and basic functions of management, thoroughly and in a unique way in global terms of the profession and science of management and safety. Previously, conferences topics were "Integrated management system and safety" (M&S 2008), "Crisis management and safety" (M&S 2009).

A new five-year program cycle of conference titled "Modern concepts of management and safety" determined with the annual topics: "Stress management and safety" (M&S 2015), "Sustainable development and safety" (M&S 2016), "Knowledge management and safety" (M&S 2017), "Project and processes management and safety" (M&S 2018) and "Safety information systems management" (M&S 2019). Those themes are a challenge for an international cooperation on scientific research and development projects, solving problems and providing models of synergy of modern concepts of management and safety of people, property and environment.

12th International Conference "Management and Safety - M&S 2017" has the current topic "Knowledge management and safety".

Mostar

"Logos Centar" Colege Mostar

<http://www.logos-centar.com>

Mostar is a city and municipality in southern Bosnia and Herzegovina. Inhabited by 113,169 people, it is the most important city in the Herzegovina region, its cultural capital, and the center of the Herzegovina-Neretva Canton of the Federation. Mostar is situated on the Neretva River and is the fifth-largest city in the country. Mostar was named after the bridge keepers (mostari) who in the medieval times guarded the Stari Most (Old Bridge) over the Neretva. The Old Bridge, built by the Ottomans in the 16th century, is one of Bosnia and Herzegovina's most recognizable landmarks, and is considered one of the most exemplary pieces of Islamic architecture in the Balkans.

"Logos centar" College Mostar is an innovative, entrepreneurial and dynamic higher education institution, which establishes new rules, a new paradigm, and a new concept of modern higher education in BiH for generations, to reflect on their entrepreneurial life and business career. Thus organized a modern and flexible study with teaching plans and programs do not suffer classical quality, but provides that every individual has the opportunity to unleash their creative and innovative potential, in a way that they recognize their business opportunity and take advantage of it.
