## INTRODUCTION

Conference "Management and Safety - M&S" reached 17<sup>th</sup> edition due to loyal authors and participants and hereby joined the rank of successful traditional and international scientific and professional conferences.

The conference has a successful history, and a promising future: human, social and economic aspects of safety, the constant emergence of new risks, and thus the need for effective and preventive measures and forms of protection, and, above all, the need for international cooperation in research and development of safety management.

Since the first conference held 2006<sup>th</sup> year (M&S 2006) to the 16<sup>th</sup> Conference (M&S 2021) gathered a total of 2,402 authors and participants: presented a total of 710 papers, which were reviewed and categorized as scientific and professional papers published in full in the proceedings of a total of 7,243 pages.

In the last years by the program cycle: "Basic functions of management and safety" (M&S 2010 - M&S 2014) conferences topics were: "Planning and safety", "Organization and safety", "Human resources management and safety", "Leading and safety" and "Controlling and safety". That program cycle presented relationship between safety and basic functions of management, thoroughly and in a unique way in global terms of the profession and science of management and safety. Previously, conferences topics were "Integrated management system and safety" (M&S 2008), "Crisis management and safety" (M&S 2009).

The new program cycle of conference titled "Modern concepts of management and safety" determined with the annual topics: "Stress management and safety" (M&S 2015), "Sustainable development and safety" (M&S 2016), "Knowledge management and safety" (M&S 2017), "Project management and safety" (M&S 2018) Process management and Safety" (M&S 2019), "Information system management and safety" (M&S 2020) and "Risk and crisis management (accent on COVID-19 pandemic)" (M&S 2021). Those themes are a challenge for an international cooperation on scientific research and development projects, solving problems and providing models of synergy of modern concepts of management and safety of people, property and environment.

17<sup>th</sup> International Conference "Management and Safety - M&S 2022" has the current topic "Business continuity management and safety".
